

HERITAGE MANOR

SKILLED NURSING & REHABILITATION

SENIOR LIVING
by Youngstown Area
Jewish Federation

Our Services

A team of skilled rehabilitation specialists with over 30 years of combined experience offer physical, occupational, and speech therapies. We offer a highly skilled continuum of care, and our experience in short and long term care, and outpatient therapy makes us a leader in the community.

Whether you or your loved one requires a short stay following an illness or procedure, a transition to long term care, or perhaps a few days of respite, one of our therapists greets you within 24 hours to determine any rehabilitation needs.

Our team, with the input of the resident and close family, will establish an individualized therapy plan and schedule that is most beneficial for improving function efficiently and effectively, making for a rewarding rehabilitation experience.

Therapy appointments are available up to 7 days a week and sessions can be during off-peak hours to accommodate family participation if necessary.

Rehabilitation

Physical, Occupational, and Speech Therapy is available up to seven days per week.

We provide exceptional care and therapy services for joint repair or replacement, cardiac recovery, stroke and/or other neurological impairments, Parkinson and other degenerative diseases or disorders, chewing and swallowing issues, bowel and bladder incontinence, fall intervention and prevention, change in behavior, cognitive concerns, communication problems, and much more.

Our facility resources incorporate real-life opportunities for residents to utilize prior to community outings or home discharge.

Our resident-centered care and team approach is proven with better than state and national average quality measures in several areas.

Upon discharge from the therapy program, highlighted resident achievements are shared with family and referring physician.

Home-going residents often demonstrate a significant increase in clinical outcomes; going from moderate assistance upon admission to set-up help or independence upon discharge in all areas of activities of daily living.

Innovative Programs

Discharge planning begins immediately for short term residents to assure a community return is safe for all involved.

A visit to the home with the resident and therapist prior to discharge allows real-time assessment of any at risk areas and need to adjust goals before leaving the facility.

We offer VitalStim for our residents with swallowing issues and education of families on issues related to swallowing difficulties.

Ongoing support is offered after discharge from all programs.

We offer outpatient physical, occupational and speech therapy.

Our Campus

Heritage Manor is situated on an 18-acre campus that provides a wide array of services and resources for every stage of life, including supportive programs through Jewish Family & Community Services.

Heritage Manor is a Jewish facility that respects the commonly held ethics and values of all major religions. Everyone is welcome at Heritage Manor, regardless of religion
